- 三、复制文件到 JETI 遥控器 (Copy Lua scrip to your transmitter)
  - 1. 连接遥控器到计算机的 USB,

Connect the transmitter to your computer via USB.

2. 复制 VS\_Jeti\_LUA 的 App 目录里的内容到遥控器的 App 目录里。

Copy the contents of the Apps(VS\_Jeti\_LUA) folder to your transmitter, into

the existing folder "Apps"

3. 断开计算机连接。

Disconnect the USB port.

#### 四、设置显示发动机状态 (Enable Display Engine Status)

#### Main Menu -> Applications

### Select User Application

## Press Add Key(+)

Tx Default R	k: 4.9V L 100%			
Select a file				
None	×			
BattMon	7.2KB			
C RCT-Cnt1	4.9KB			
C RCT-LiPo	7.8KB			
🗋 vspeak	7.1KB			
Back	Ok			

### Select "vspeak"

Select ECU Type -> SWIWIN

Select "VSpeak Status Turbine left"

Select "SW" "Status"

#### 五、添加发动机状态到遥控器的主界面

Add the engine status to the main interface of the transmitter

Main Menu -> Timers/Sensors

Tx Default	Rx: 4.9V 100%				
Displayed Telemetry					
Voltage Rx     Antenna	Telemetry Double No (*) No (*)				
Ade	d Dèl. Ok				
Tx Default	Rx: 4.9V 100%				
TxII Default Select	Rx: 4.9V 100%				
TxII Default Select OODOX Model Time Trim	Rx: 4.9V 1 100%				
TxDefault Select Doboox Model Time Trim VSpeak ECU statu SW: Status []	Rx: 4.9V 100% Option				
TxII Default Select Model Time Trim VSpeak ECU statt SW: Status [] SW: RPM [rpm] SW: Temp [C]	Rx: 4.9V       100%         Option				

Add this Following options

"VSpeck ECU Status" "SW: RPM[rpm]" "SW: Temp[C]" "SW: PwrVol[V]" "SW: PumpVol[V]"

Tx Default Rx: 4.9V

显示效果如下(The display effect is as follows)

Tx Default	Rx: 4.9V 100%
Voltage Rx 4.99V	VSpeak ECU status Stop
Antenna A1 9 A2 9 100%	sw: RPM Orpm
Aaaaa	SW: Temp 22C
USB Page 1/2	SW: PwrVol
×	Start Cir

# 六、JetiBox

Main Menu -> Applications -> Jetibox

Press Right Key to Select "MX"

Press Down Key To Display SWIWIN Menu

Jetibox 可以设置 ECU 的油泵点火电压和加速曲线

Jetibox Can Set the ECU' Pump Ignition voltage and RPM ACC
